Need Help or Support?

 [Visit our Support Portal](#)

We know that sometimes you just need a bit of help. If something isn't quite right or you need a bit of guidance, contact our customer support team and we'll work to support you as best as we can. Either click on the box above or head to sofly.io/support

INSTALLATION (Non-Orbx)

Installation of Animals is done through the 'Community' folder.

Simply drag and drop the 'sofly-sightseeing-animals' folder into your Microsoft Flight Simulator 'Community' folder.

Once done, load the sim.

INSTALLATION (Orbx customer)

If you have purchased Animals through Orbx, then you can use their Orbx Central app to install Animals.

Search for the product, click on 'Install' and Animals will automatically be installed into the correct place.

INSTALLATION (Sim Marketplace)

Once Animals for MSFS is available through the in-sim Marketplace, you will be able to install it directly through the sim.

It can be done just like every other product. Click on 'Buy and Download' and complete the transaction. Once done, it will automatically download the latest version into your simulator.

IMPORTANT NOTICE

You must ensure that the simulator is not running prior to the installation of Animals for MSFS (excluding the in-sim Marketplace installation)

Where are the animals?

Over 13,000 animals have been manually placed across the world. A number of types of animals are spread across the world. You will be able to find them globally in various locations.

Free Flight

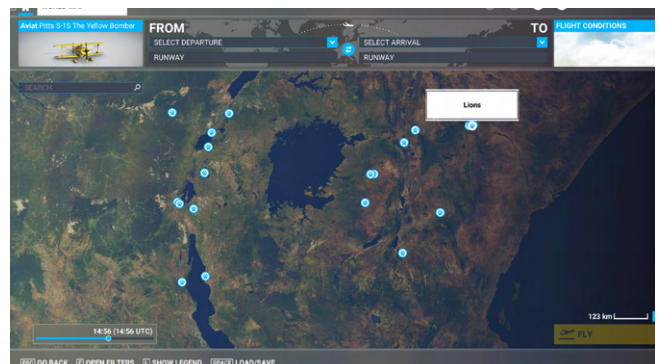

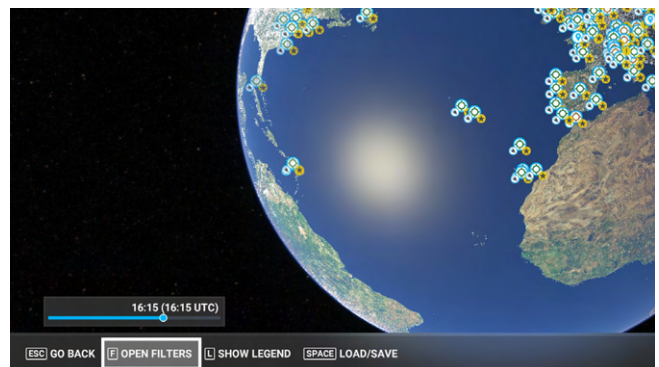

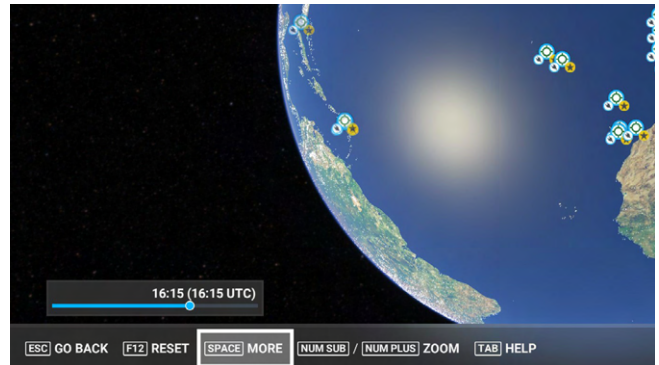

From the World Map menu, you will be able to use the filter system in order to show the available fauna to you.

To do this:

Press 'MORE' in the world map menu.

Press 'OPEN FILTERS' to show the filter menu.

From here, ensure that you turn on 'Fauna' and disable other options to make it easier to find.

During Flight

As you're flying around you may want to specifically go on missions to find the nearby animals. You may stumble upon them easily or you may want a helping hand.

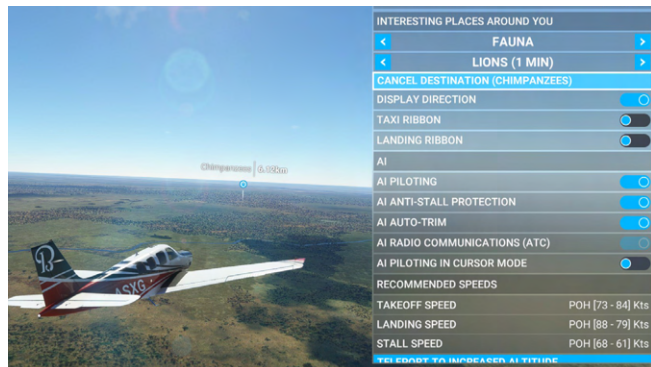

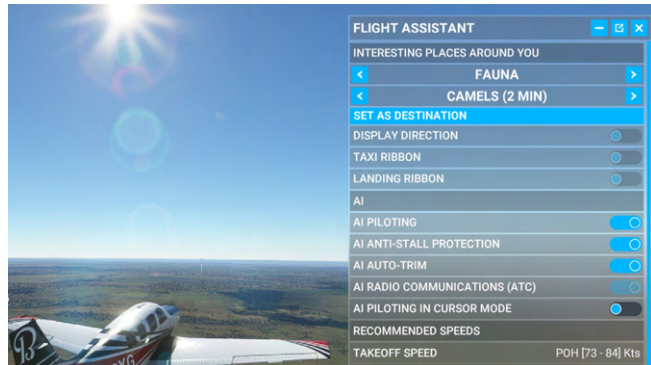

If you want some help, you can try these options.

1 - Using the fauna POI Markers.

For most of the animals we have added, the POI marker will follow the animal around. You can turn this on / off in the assistance settings.

2 - Using the built-in AI pilot to help you.

In order to turn on the AI pilot to help you, select it from the in-sim toolbar menu during the flight. From there select 'Fauna'. If there are any nearby, then you set it as a destination. Your AI pilot will help you by flying and seeing a path for that animal.
